

Just a few testimonials.

"After seeing this work, I'm convinced that this is the best product to not only neutralize odor, but promote hoof health. Dry footing can prevent a lot of the hoof problems we see every day."

**Mitch Taylor, AFA Certified Journeyman Farrier and
Director of the Kentucky Horseshoeing School**

"My paddock smells cleaner and we remove less soiled bedding when cleaning the stalls. In my years in the industry training some of the most legendary horses and winning the biggest races, I have not seen any product that can outperform the Odor-No-More™ products".
**-Jack Van Berg, Hall of Fame
Thoroughbred trainer.**

I tested the products extensively and now recommend them to my customers and use them throughout my own facility. The fly population has been reduced significantly and I believe the products will prove to be very beneficial to the long-term hoof health of my animals ".
-Rocky Waldt, Master Farrier and Trainer.

I have searched for years looking for a product that I could mix into my hard, clay dirt, which trapped odor and bacteria. Since I started using Odor-No-More™, about three months ago, my stalls no longer smell like ammonia and my bedding costs have been reduced by 75%. Thanks to Odor-No-More™ I now have more time to enjoy my horses and money to put in my pocket.
-Kristi S.

Odor-No-More™ raked into the outside stall footing have regenerated it keeping it soft and needing little or no bedding. Now a couple of handfuls on the urine spots daily gets rid of the smell in minutes and dries them too. Using it with shavings in the box stall the smell is gone, shavings are dry and I don't have to constantly remove and replace.
-Sally W.

"We tested Odor-No-More in the stall of an extremely wet mare. This extreme case really proved that the product performs. It really does eliminate odor and moisture while reducing the amounts of bedding changed and disposed of. We estimate the savings on this stall alone, to be more than \$300 per month. In our second trial we tested the product in 30 box stalls and we experienced the same performance results. The reduction in bedding consumption is huge. I am sure our disposal costs will decrease as well. When you consider that we have more than 400 stalls, the cost savings is very significant. I would not have believed this was possible if we had not done the trial."

Alison Hathaway, General Manager, Huntington Park Equestrian Center
